TORNERÍA DEMA

A STORY OF FAMILY AND CRAFTSMANSHIP

FOUNDED IN

1965

The origin of Tornería Dema

Tornería Dema was established in Maracay in 1965 through the experience and passion of Mario De Marco, an Italian craftsman from Molise. From its earliest years, the workshop specialized in transforming wood through traditional carpentry and precision woodturning.

For more than six decades, the company has produced stairs, doors, columns, furniture, wall coverings and custom objects. Attention to detail, knowledge of the material and bespoke production remain at the heart of every project.

Mario De Marco

FOUNDER'S NAME IN SIGNATURE STYLE

Mario De Marco

FOUNDER

Wood shaped by craftsmanship.

Tornería Dema was founded in 1965 by Mario De Marco. In our Maracay workshop, we create custom carpentry and woodturning projects that combine traditional skill, precision and attention to detail.

ARCHITECTURE

Stairs, doors, roofs, columns and wall coverings for indoor and outdoor spaces.

FURNITURE

Bars, bottle racks, chairs, cradles and pieces made to fit each space.

WOODTURNING

Balusters, columns, knobs and decorative elements with classic or custom profiles.

OBJECTS

Turned pieces, decorative accessories, funeral urns and custom commissions.

Custom stairs and railings

Curved staircase

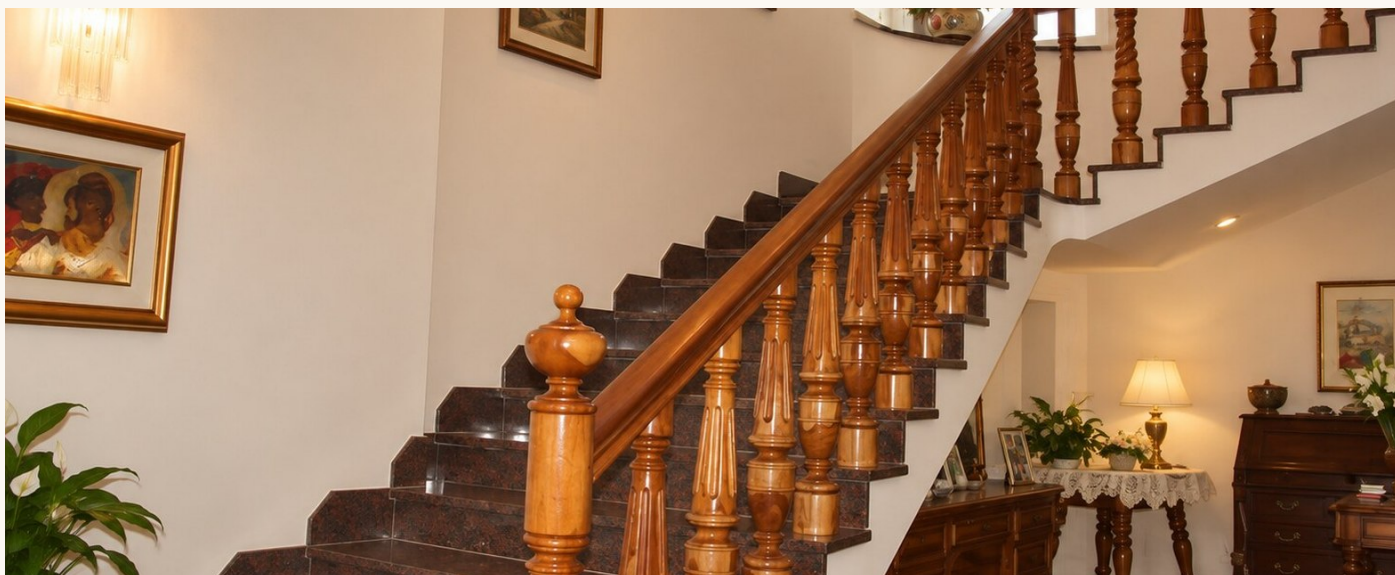

Architectural woodwork with a continuous handrail and turned balusters. Designed to complement the circulation and proportions of the interior.

Spiral staircase

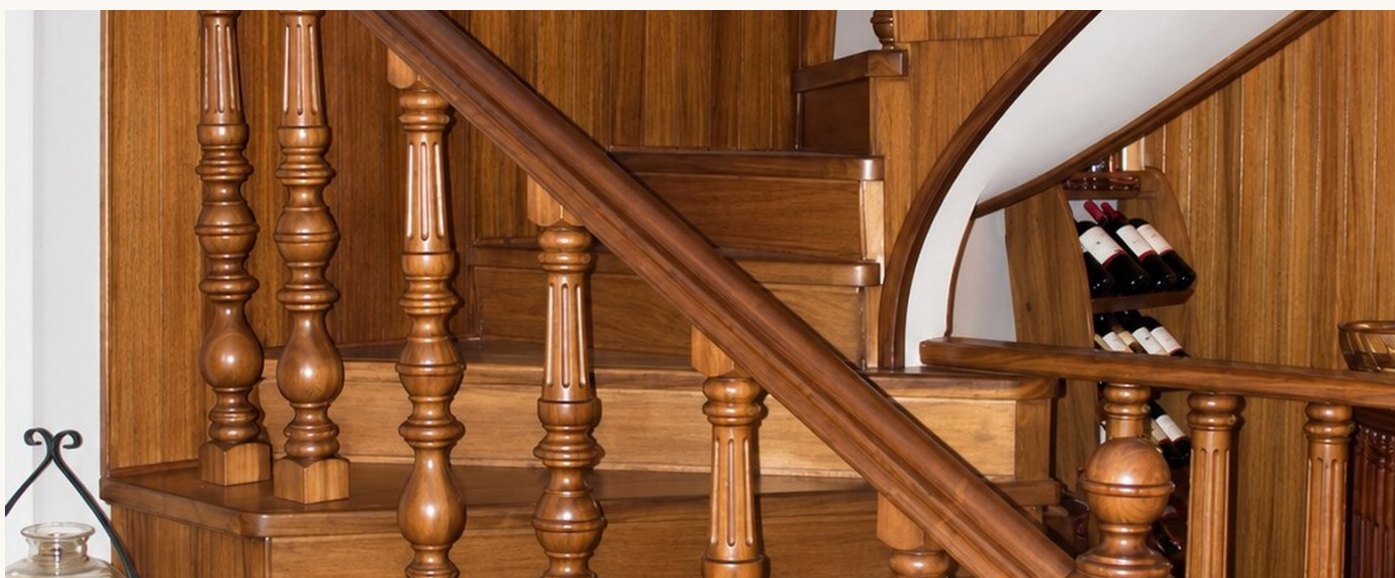

A compact solution featuring a central column, wooden steps and turned balusters. A functional piece that becomes a visual focal point.

Details that define a space

Classic interior

Turned handrails and balusters coordinated with the steps and interior finishes. Every element is produced to the project's exact dimensions.

Solid wood

A substantial staircase with a wooden structure, steps and railing. It can be adapted to different styles and configurations.

Handcrafted doors

Custom design

A carved wooden door with a warm finish. The design can be adapted to the opening, architectural style and desired level of detail.

Arched entrance

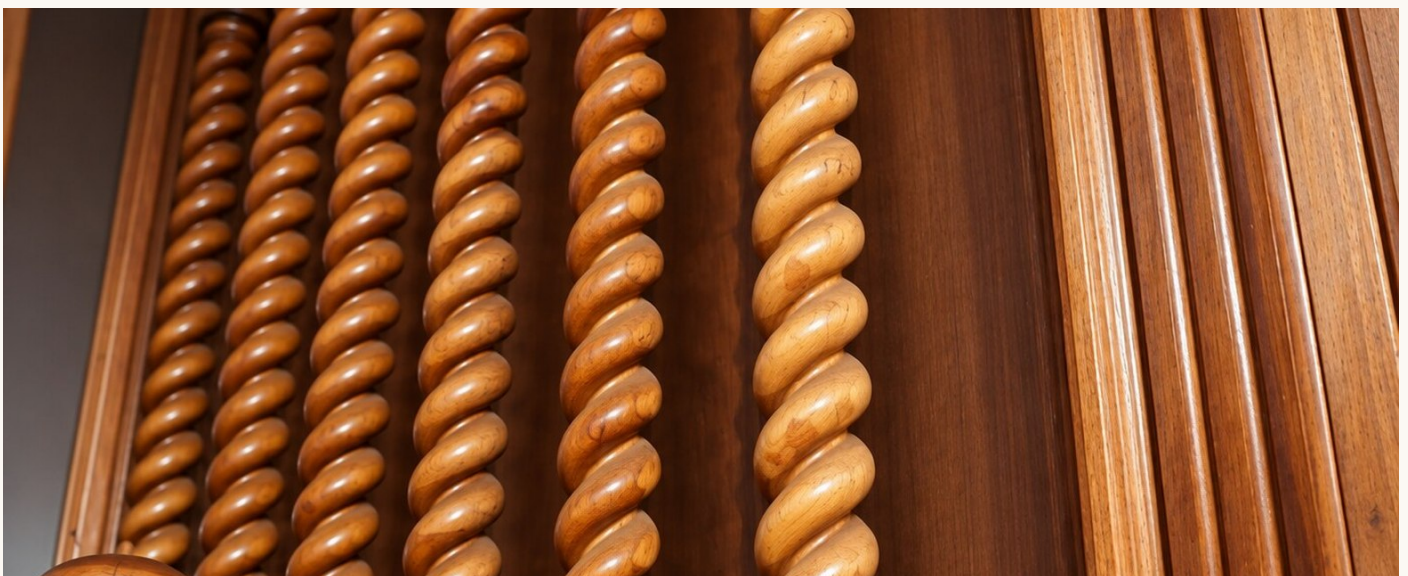

A double door with a curved top, panels and mouldings. Made for entrances that require character and special proportions.

Columns and balusters

Decorative columns

A series of turned columns with classic profiles, available in custom sizes and designs for staircases, furniture and interior architecture.

Helical turning

Spiral-patterned columns that combine technical precision with a sculptural effect, ideal for focal pieces and distinctive details.

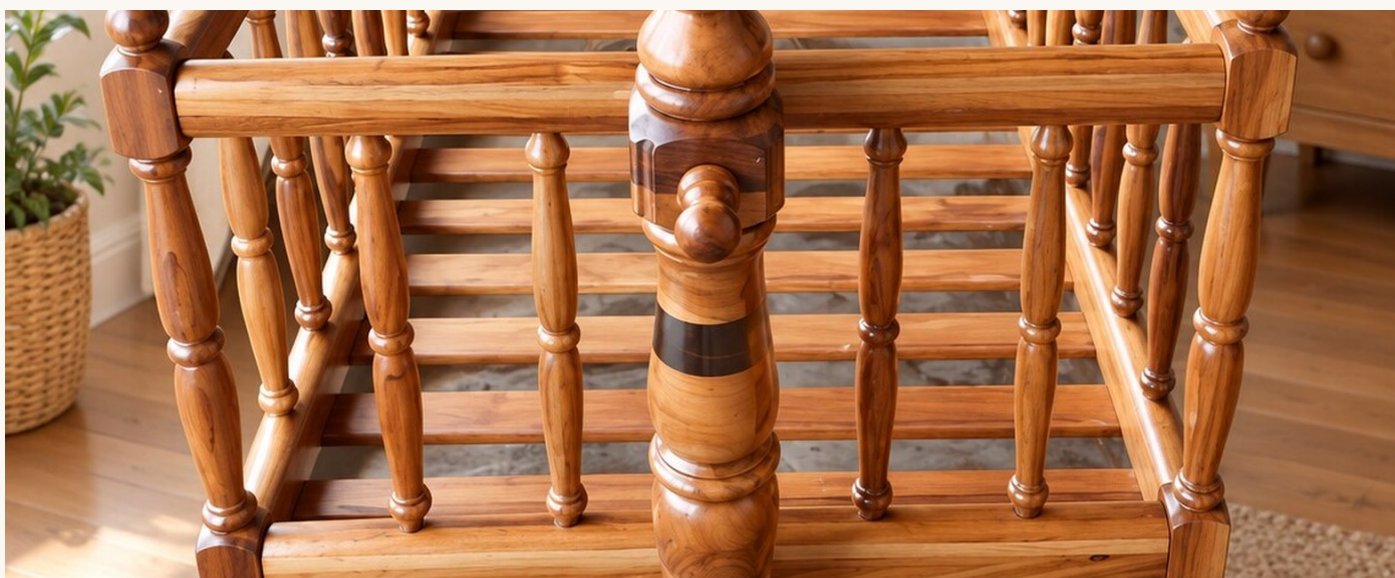

Furniture with a handcrafted identity

Turned rocking chair

A handcrafted rocking chair with a balanced structure and multiple turned components, designed to unite comfort, movement and tradition.

Handcrafted cradle

A wooden cradle with rails and turned details, custom made to harmonize shape, proportion and finish.

Bars and bottle racks

Bar Campestre

Commercial furniture with a counter, bottle rack, balusters and helical column. A complete installation that organizes service and reinforces the space's identity.

Residential bar

A home bar with storage, bottle display and coordinated stools, adapted to the available dimensions.

Decorative pieces

Handcrafted lamp

A turned lamp base with a decorative silhouette and polished finish, customizable in shape and tone.

Hourglass

A decorative object with turned supports and columns. A small-format piece that reflects careful attention to every detail.

Collections and containers

Turned containers

A collection of table and decorative pieces designed to highlight the natural form and warmth of wood.

Segmented wood

A lidded spherical vessel made from differently toned segments, creating a unique pattern in every piece.

Turned wooden urns

Funeral urn collection

Handcrafted urns made from turned wood, with restrained forms, fitted lids and religious details. Each model can be produced with a customized finish.

Lidded container

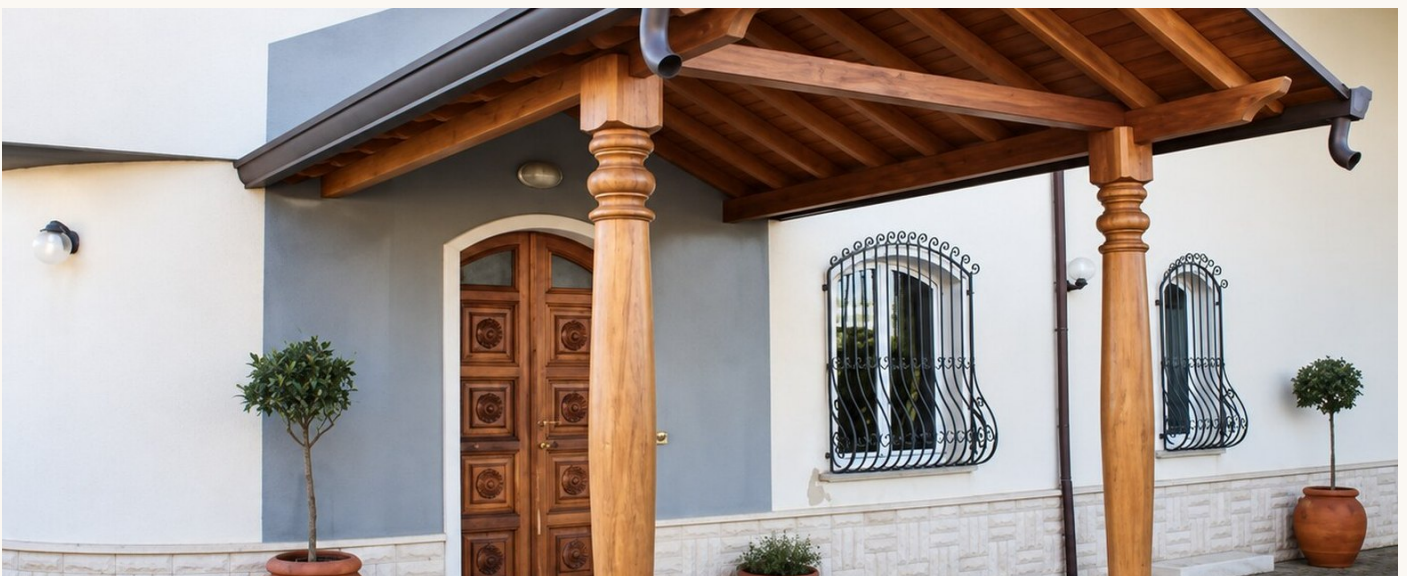

A turned piece with classic lines and a fitted top, demonstrating precision in the joint and continuity of the profile.

Wood for indoor and outdoor spaces

Colonial-style roof

A timber structure designed to cover generous spaces and create architectural rhythm through carefully resolved beams and joints.

Covered entrance

An outdoor timber canopy that protects and defines the entrance while adapting to the existing architecture.

Wood wall coverings

TONGUE-AND-GROOVE WALL PANELS

Warmth, continuity and a handcrafted finish.

We manufacture precisely interlocking tongue-and-groove boards for uniform, durable walls. Each project is adapted to the room dimensions, wood species and desired finish.

CUSTOM MADE · PRECISE FIT · NATURAL WOOD FINISH

From the workshop to the final finish

Wood selection, cutting, turning, sanding and finishing: every stage is completed with care to create solid, balanced pieces designed to last.
